Your basic discount: _____

Your minimum for prepaid transportation: _____

Your representative: _____

Cellular: _____

Terms: Net 30 days
Interest of 2% monthly will be charged on overdue accounts.

Credit limit: If invoices are not paid (overdue account), Chidaca will cancel the credit limit and orders will be delivered C.O.D. An unpaid overdue account will delay order processing.

Minimum billing: $100.00 before taxes for merchant-retailers. A fee of $5.50 will be charged for any order below the minimum required.

Quantity required: Complete box per item for retailers, complete carton for distributors / wholesalers / purchasing groups.

Catalog price: Prices are FOB to the Chidaca warehouse, Brossard, Qc. Prices are subject to change WITHOUT NOTICE.

Guarantee: The warranty only covers original manufacturing defects (transport not included). Defects caused by abnormal use are not guaranteed.

Claim: To ensure adequate tracking of merchandise in transit, any insufficiencies/discrepancies in your order and products damaged during transportation must be reported within 48 hours of receipt of your order. It will be difficult for us to trace the packages/carriers after this period and the claim may be refused.

Return policy: No returns will be accepted without CHIDACA authorization number. A 20% handling fee will be charged; 25% will be charged for items returned with the customer's labels. The customer is responsible for transportation costs. Goods returned without a CHIDACA authorization number will be returned to the customer at their expense.

Picking: Customers who come to collect the merchandise must send their order by telephone/fax/email at least 24 hours in advance so that it can be processed.

Transportation: Shipping prepaid is only applicable for merchant-retailers (except customers with a special agreement).

Prepaid transportation

Identify your area and refer to the minimum by area below to determine your transportation minimum to have prepaid transportation.
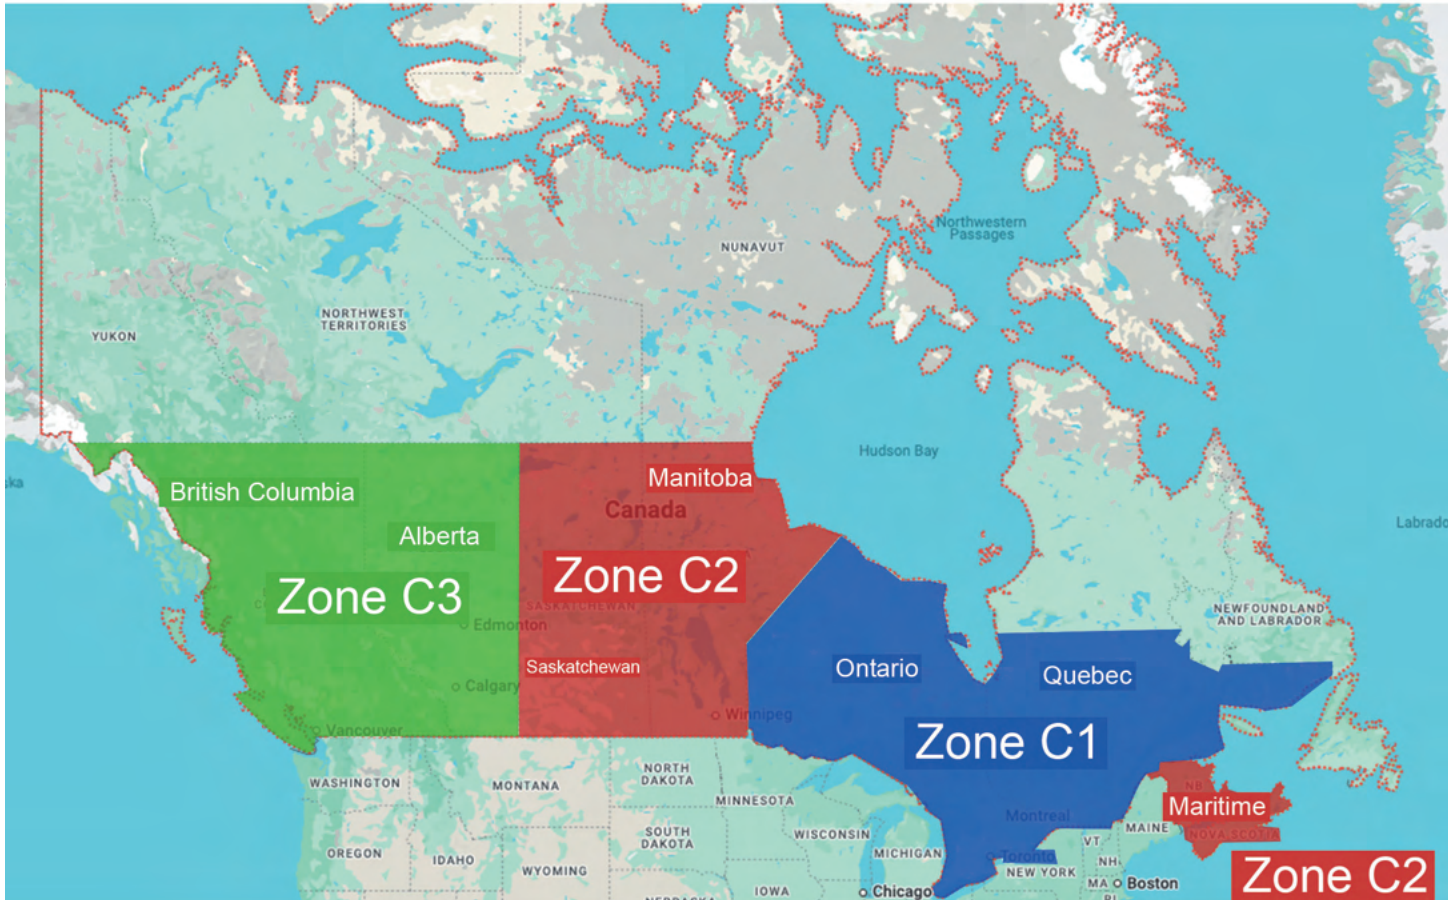

Zone C1: Minimum for prepaid transportation: **500$**
Zone C2: Minimum for prepaid transportation: **850$**
Zone C3: Minimum for prepaid transportation: **1500$**

*Minimum of 6 extension extension poles (models and sizes combined)
**For customers outside of Quebec, contact your representative for more information.

EXCLUSIVE PROGRAM
Painting Accessories Selection Guide

EXCLUSIVE
INNOVATIVE

Discover our exclusive program which revolutionizes the selection of painting accessories. Thanks to our innovative concept, compare our products easily and quickly to find the perfect tool that will meet your needs.

Fast and simple

Pour toutes peintures mais pour de meilleurs résultats:
For all paints but for better result:

Absorption
Contrôle / Control   Finition / Finish
                          Robustesse / Robustness
Type de peinture · Viscosité
Type of paint · Viscosity
Basse / Low   Haute / High

Type de surface / Type of surface
Lisse / Smooth   Rugueuse / Rough

No.18863
www.chidaca.com
Produit pour / Produced for : Chidaca
6 89153 18863 4

Benefits of the program

1 Fast comparison

Quickly compare the features of each accessory, from brushes to rollers, to make informed decisions.

2 Improvement purchases

Improve your customers' purchases with clear and detailed information, allowing them to choose the best products for their projects.

3 Product differentiation

Each product is clearly labeled with its specifics, facilitating differentiation and selection, which increases customer satisfaction.
1 Result optimal

With the paint type and surface type clearly identified, find the best applicator for every stroke.

Quality difference

Absorption   Finition / Finish
Contrôle / Control   Robustesse / Robustness

Includes 4 essential criteria such as absorption, control, finish and robustness. Makes it easy to compare quality and choose the one that best suits your needs.

Type of paint

Type de peinture · Viscosité / Type of paint · Viscosity
Basse / Low   Haute / High
This chart helps you identify which applicator is best suited to the viscosity of the paint you are using. Whether thick or fluid paints, find the perfect tool for optimal application.

Type of surface

Type de surface / Type of surface
Lisse / Smooth   Rugueuse / Rough
Our guide tells you which applicator is best for different types of surfaces. Whether you're working on wood, metal or plaster, make sure you get a flawless finish using the right tool.

CHIDACA®

PROFESSIONAL PLANOGRAM SERVICE

We offer professional planogram solutions that optimize your shelf space and increase your sales.

Planogram creation personalized

Our planogram experts work closely with you to design custom solutions adapted to your specific needs.

Efficient and quick installation

Our team guarantees a quick and smooth installation, optimizing your shelves in record time to maximize efficiency and improve the customer experience.

Optimization of sales space

By optimizing the layout of your products, we help you maximize available space and improve your customers shopping experience.

Contact us today

for a free consultation and find out how we can improve your sales space.

CHIDACA®

OUR SUPERIOR QUALITY BRUSHES

Discover the difference in quality with our professional brushes. Designed to deliver exceptional performance, our brushes stand out for their innovative design and high-quality materials

1 ### High fiber quantity

Our brushes are made with a high fill density, which means they contain a high number of fibers per unit area. This higher density ensures uniform and effortless paint application, allowing surfaces to be covered more efficiently and with fewer streaks. Thanks to this feature, our brushes hold more paint and provide a professional finish with every use.
Chidaca brush
Competition

2 ### Two small wooden spacers

The small wooden spacers in our brushes create an ideal space for holding paint, without being too large, which maximizes the brush's paint-holding capacity. This design enhances paint retention and reduces the need for frequent refills. Additionally, the wood used for the spacers helps grip the paint more effectively than the plastic spacers commonly found on the market. Using two small spacers instead of a single large one increases the fiber density, forming a double chamber that optimizes paint retention.

3 ### SRT fibers (Solid, Round, Tapered)

Our SRT fibers are designed to deliver superior performance. SRT fibers are solid, meaning full and not hollow, which ensures better durability and optimal performance with each use. They are round (thus thin at the tip), which allows better paint retention and more precise application.

Chidaca Brush

Competition

4 ### "Tapered" fibers for precise application

Our brushes feature heated fibers to bend the bristles inward. This unique design allows the tip to fold back on itself when filled with paint, creating a finer tip that prevents paint from leaking out. As a result, you get a more precise paint application and a more uniform tip, minimizing the chance of slippage or bristle separation. This characteristic is particularly advantageous for precision work and careful finishes.

CHIDACA®

OUR TOP QUALITY ROLLER

Discover the exceptional performance of our professional rollers. Designed to provide even coverage and effortless application, our rollers feature high fiber density and innovative construction.

1 High fiber density (FPI)

Our rollers are manufactured with a high Fiber density Per Inch (FPI), which allows effortless and uniform paint application. This high density is particularly suitable for high viscosity paints which require a higher FPI level, which ensures optimal coverage with less streaking and touch-ups required.
Chidaca roller

Competition

2 Fabric fusion process

Some of our roller use a unique process where the fabric is fused to the polypropylene center without the use of glue. This process involves heating the exterior of the polypropylene center, allowing the fabric to fuse directly to the center. This ensures a more durable and uniform adhesion of the fabric, improving the performance and durability of the roll.

Test with a Chidaca roller on a black background

Test with a competition roller, roller stroke and low coverage is noticeable

3 Center in Polypropylene

The center of our rollers is made of polypropylene, a light and durable material. This material provides excellent durability while reducing the weight of the roller, making paint application easier and less tiring for the user.

4 Exclusive roller quality

We partner with one of the largest factories in the world, giving us access to premium and exclusive fabrics. This collaboration ensures we use the highest quality materials, resulting in rollers that are more durable, more efficient and capable of delivering professional results with every use.

CHIDACA®

EXTENSION POLE IN FIBERGLASS

Durable & reliable

Our fiberglass extension handle with exclusive "round" knob provides unmatched durability and performance. Try it today and experience the difference.

- Durable button: more durable than the competition
- Seal button: prevents paint infiltration
- Hexagonal structure: Aluminum hexagonal for increased rigidity

A visible difference

Reinforced mechanism

Our handle is distinguished by its entirely metal head, which prevents any risk of breakage. Unlike competing products, our mechanism is reinforced and sealed, ensuring superior durability and performance. The square knobs on the market are not only flimsy but also allow paint to seep through. With our innovative design, you benefit from a robust and reliable tool, perfectly adapted to the requirements of professionals.

Hexagonal structure

Our competitors' handles use a rounded structure, which compromises stability, particularly at high heights where precision is crucial. In contrast, our handle is designed with a hexagonal structure which provides superior rigidity and stability, reduces unwanted movement and ensures optimal precision. For professionals looking for reliability and precision in their tools, our hexagonal extension handle is the ideal choice.

Extension pole - Fiberglass
Exterior extension handle in fiberglass and interior in aluminum 2 sections. Robust, rust-proof and ultra-stable. Changeable metal head. Ultra-robust pin lock system. Hexagonal structure.

Changeable metal head
Sealed and changeable button

CHIDACA®

OPTIMIZE YOUR RETAIL SPACE WITH OUR DISPLAY BOXES FOR CAULKING GUNS

A simple solution to improve the organization and aesthetics of your department

BEFORE	AFTER

BEFORE: Caulking guns are often displayed in metal baskets or hung on hooks, resulting in a messy, cluttered display. This storage method not only limits the amount of products that can be displayed on shelves, but it also reduces the visual appeal of the shelf, making the shopping experience less pleasant for customers.

AFTER:

1
Space saving:
Previously, a row could hold a maximum of 45 caulking guns, but thanks to our **display boxes**, it can now accommodate up to 84.

2
Improved aesthetics:
Our **display boxes** offer a more organized and attractive presentation, attracting more customer attention and increasing visual impact on the shelf..

3
Ease of installation and use:
Not only are our boxes easy to place on a shelf, but they also allow the number of boxes per product to be quickly adjusted, without the hassle of changing a metal basket, making the adjustment more flexible and efficient.

4
Product distinction:
Each carton is equipped with an informative label, making it easier for consumers to identify the caulking guns compatible with their specific needs, making the choice simpler and faster.

METAL BRUSH

High quality carbon steel

Our wire brushes are designed to provide optimal performance and exceptional durability. Made from high-quality steel, they feature a black oxidized finish that protects them against rust, ensuring a long lifespan. The ergonomic wooden handle provides a comfortable and natural grip, allowing precise control during the most demanding jobs. These brushes are ideal for stripping, deep cleaning and surface preparation.
